SUPPLEMENTAL RESPONSE

Commissioner for Patents
Washington, DC 20231

Sir:

Further to Applicants' response filed on June 20, 2002, Applicants herewith submit a Declaration by Dr. Thomas Renne. As stated in the response, Dr. Renne presents results indicating that HBP displaces H-kininogen assembled on the surface of immobilized heparan sulfate or endothelial cells better than histidine-rich glycoprotein, factor XII or HK itself and that HBP and kininogen do directly interact.

The Examiner is hereby invited to contact the undersigned by telephone at (914) 712-0093 if there are any questions concerning this response.

Respectfully submitted,

Date: 8/29/02
